EDUCATION

Master in Computer Science 2026 - Present
Computing Research Center (CIC),
Instituto Politécnico Nacional (IPN), Mexico

Bachelor's in Computer Science 2021 – 2025
University of Punjab, Pakistan
CGPA: 2.80/4.0

RESEARCH INTERESTS

Artificial Intelligence for Social Good, Natural Language Processing, Clinical Text Processing, Machine Learning, Deep Learning/LLMS, Data Science (DS), and Gen AI & MLOps practices

Advances in Auto-Grading with Large Language Models: A Cross-Disciplinary Survey. In Proceedings of the 20th Workshop on Innovative Use of NLP for Building Educational Applications, pages 477–498, Association for Computational Linguistics (ACL). https://aclanthology.org/2025.bea-1.35.pdf

SKILLS

- Programming Languages: Python, JavaScript, C++
- Libraries: Pandas, NumPy, spaCy, SciPy, Seaborn, matplotlib, Scikit-learn, Keras, TensorFlow, Transformers, PyTorch, PyMongo, Plotly, LaTeX, Overleaf, HTML, CSS, Git, LIWC, Tableau, MySQL
- Databases: MySQL
- MLOps Tools: Docker, Git, GitHub Actions
- AI/ML/DS Tools: NLP, Langchain, Scikit-learn, Pytorch, Karas, TensorFlow, Large Language Models, Databricks, Vector DB, Pandas, PySpark
- Cloud Platforms: GCP, AWS, Azure
- Web technologies: Fast Api, React, Next, Laravel
- Project Management Tools: GitHub

PROFESSIONAL EXPERIENCE

Internship – Uniworth Pvt. Ltd. Aug 01, 2025 – Sep 02, 2025

Lahore, Pakistan

Project: Completed a two-month internship at **Uniworth**, Pakistan's leading clothing brand. Gained valuable insights into professional retail operations, brand management, and fashion industry standards. Strengthened practical skills and developed a deeper understanding of how innovation, quality, and organizational excellence drive a market-leading brand's success.

PROJECT

- **Project Lead** Oct 11, 2024 – Present

  Elite Freelancers Platform

  Project: Leading the development of Elite Freelancers, an AI-integrated freelancing platform designed to connect clients and freelancers efficiently. The system includes modules for job posting proposal management, contract handling, and secure payment processing. It also features intelligent freelancer project matching, administrative category control, and transaction monitoring to ensure transparency and operational scalability.

- **Project Coordinator** Mar 03, 2023 – July 02, 2023

  Cloud Kitchen Platform (Software Project Management Phase)

  Project: Led the initiation phase of the **Cloud Kitchen** project—an online platform enabling home based chefs to sell food with integrated AI-driven recommendation features. Conducted feasibility analysis covering technical, financial, and legal aspects, and defined project scope, stakeholder roles, and risk management strategies to ensure successful project planning and execution.

- **Research Supervisor** June 08, 2024 – Nov 11, 2024

  Dust Mitigation and Performance Enhancement of Photovoltaic Panels

  Project: Supervised a bachelor-level research project titled *"Investigating the Dust Particles and Improving the Performance of Photovoltaic Panels by Sliding Cleaning Technique."* Guided students through the process of experimental design, data collection, and performance measurement of coated and uncoated solar panels. The team developed an Arduino-based automated cleaning mechanism using a stepper motor to periodically remove dust, significantly improving panel efficiency and energy output.

RESEARCH EXPERIENCE

- **Research Project** May 01, 2025 – Oct 22, 2025
  Project: Conducted an advanced research study on hope speech detection in multilingual social media datasets. Implemented and compared multiple machine learning (e.g., Logistic Regression, SVM, Naïve Bayes) and deep learning models (e.g., BERT, RoBERTa, DistilBERT) for binary and multi-class classification tasks. Analyzed linguistic ambiguity and cross-lingual generalization to enhance model interpretability and robustness for psychological discourse analysis.
